

Introduction

SeBS360 Exchange Workshop #1

The European Space Agency

ESA is Europe's gateway to space.

Its mission is to shape the development of Europe's space capabilities and ensure that investment in space continuously supports the competitiveness of the European industry and delivers benefits to the citizens of Europe and the world.

ESA monitors the economic value of the space sector, and of Europe's competitiveness and measures the socio-economic impact of its activities.

ESA's Sentinels Benefits Observatory: objectives

- Provide the Agency with a regular influx of use case examples that are relevant for the Agency
- Understand users and usages to support the ESA strategic planning and improvement of services
- Support further user uptake through concrete examples
- Stimulate wide-spread grassroots analyses by promoting a general culture of impact assessment practices among Sentinel users
- Make sure that top-town benefits assessments are anchored to real use cases of interest

Sentinels Benefits Observatory: core activities

Sentinel Benefits Study

A successful legacy

<https://earsc.org/sebs>

Copernicus4regions

Anchoring to LRAs and politicians

<https://www.nereus-regions.eu/copernicus4regions/>

GEOValue

Promoting impact assessments at international level

<https://geovalue.org>

Sentinel Benefits Study 360

An all-around investigation about Sentinel benefits

Meeting Objectives

Promote a wide-spread culture of impact assessments for EO-based solutions

Understand benefits of impact assessment analyses for providers and users alike

Share impact assessment findings and methodologies

Explore potential for further interactions and analyses

THANK YOU!
